KEN LEMUEL SOMBREO

Software Engineer | DevOps | Blockchain Engineer

+63 994 074 5520| kenlemsombreo.liloan@gmail.com | github.com/KenSombreo | linkedin.com/in/ken-lemuel-sombreo-a4ba9116a

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building scalable web applications, secure backend services, and Linux server infrastructure using Next.js and NestJS. Skilled in designing and securing REST APIs, deploying containerized applications on Proxmox-hosted Linux servers, configuring Nginx and SSL/TLS, and building GitHub Actions CI/CD pipelines. Experienced in managing blockchain infrastructure, including RPC, Archive, and Collator nodes on Substrate/Polkadot-based networks.

PROFESSIONAL EXPERIENCE

Software Engineer / Blockchain Engineer — Blockspace Corporation *December 2025 – Present*

- Develop and maintain scalable web applications using Next.js on the frontend and NestJS on the backend, delivering new features and performance improvements.
- Design and secure REST APIs with authentication and input validation to support internal and client-facing services.
- Provision and manage Linux production servers on Proxmox, deploying containerized applications with Docker for consistent, repeatable environments.
- Operate and maintain blockchain infrastructure — including RPC, Archive, and Collator nodes — on Substrate/Polkadot-based networks, monitoring uptime and sync reliability.
- Configure Nginx as a reverse proxy, manage SSL/TLS certificates, and build CI/CD pipelines with GitHub Actions to automate testing and deployment.
- Collaborate with cross-functional teams (frontend, backend, and infrastructure) to plan and ship high-performance software on schedule.

Software Engineer / DevOps — 4Nexgen *August 2024 – November 2025*

- Developed responsive, user-facing web applications using Next.js and React, focusing on performance and cross-browser compatibility.
- Built backend services and APIs using NestJS and Node.js, integrating with databases and third-party services.
- Designed and secured REST APIs with authentication, input validation, and rate limiting to protect backend services.
- Deployed and maintained applications on Linux servers, managing environment configuration, uptime, and basic server hardening.
- Set up and maintained CI/CD pipelines using GitHub Actions to automate builds, testing, and deployments.
- Configured and managed Nginx for reverse proxying and serving production applications.
- Monitored application performance and database queries, identifying and resolving bottlenecks to improve response times.
- Collaborated with product and design teams to translate requirements into production-ready, deployable features.

Software Engineering Intern — Blockspace Corporation *January 2024 – April 2024*

- Assisted in developing and testing features for web applications under senior engineer guidance.
- Gained hands-on exposure to blockchain node infrastructure, including basic node setup and monitoring.
- Supported testing and debugging efforts, helping identify and resolve issues prior to deployment.

PROJECTS

Blockscanner	Blockchain explorer built with Next.js and NestJS for viewing blockchain data and transaction history.
Xaver Mining	Blockchain marketplace platform developed with Next.js and NestJS.
Vesting Platform	Token vesting application built with Next.js.
MultipayX API	Backend payment and on/off-ramp API developed using NestJS and MongoDB.
Sheloure Closet	Modern fashion rental website built using Next.js.

Xode Nodes	Deployed and managed validator, collator, archive, and RPC nodes for a Substrate-based network.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, Rust
Frontend	Next.js, React.js, HTML5, CSS3, Tailwind CSS
Backend	NestJS, Node.js, REST APIs
Databases	PostgreSQL, MySQL, MongoDB
DevOps & Infrastructure	Linux, Docker, Nginx, Git, GitHub, GitHub Actions (CI/CD), Proxmox, FortiGate
Blockchain	Substrate, Polkadot, RPC Nodes, Archive Nodes, Collator Nodes

EDUCATION

Bachelor of Science in Computer Engineering
Southern Leyte State University — Sogod, Southern Leyte, Philippines
2020 – 2024 | Cum Laude
